SUMMARY

Aspiring technology project manager with experience contributing to the development of web products and AI-powered applications, from requirements analysis and feature definition to development coordination and deployment. Brings a technical foundation in backend and frontend development, databases, and microservices architecture, with a focus on clear communication, organized execution, and aligning product goals with technical solutions.

TECHNICAL STRENGTHS

Core: Java, Python, SQL, Spring Boot, HTML/CSS| **Delivery:** Requirements analysis, feature scoping, task coordination, API integration, technical documentation, project planning and scheduling, requirements and scope management Git

Tools: Codex, VS Code, Git/GitHub, Docker, Render, Microsoft Office | **Languages:** Vietnamese, English (technical reading)

EXPERIENCE

Backend Developer Intern — TrueConnect Technology JSC

Aug 2025 – Sep 2025 | Vietnam

- Coordinated task assignments among interns and tracked day-to-day progress.
- Contributed to building and packaging software products.
- Prepared project timelines and progress reports for the mentor.
- Participated in daily team meetings and shared status updates.
- Collaborated with frontend developers and business analysts to support project delivery.

Software Developer Intern — Bach Khoa High-Tech Training and Technology Transfer JSC

Oct 2025 – Dec 2025 | Vietnam

- Built a PostgreSQL demo database for a project.
- Developed APIs for user management and file uploads.
- Built an interface for uploading and displaying course materials.
- Project website: tech.bkapi.vn

EDUCATION

Hanoi Architectural University — Information Technology | GPA: 3.09/4.00 | Oct 2022–Feb 2027 (Expected)

Additional Training: Full Stack Java Web Application Plus, Bachkhoa Education Aptech | Mar–Nov 2025

Additional Training: AI 20K, Track 4: Computer Vision and Robotics, VinUniversity |Sep 10 - 2026

TOEIC Pre-A, Manh Ha TOEIC Center Mar - Oct 2025

SELECTED PROJECTS

HAU Exam — AI-Powered Exam Management Platform

Java, PostgreSQL, React, React Native, RabbitMQ

- Contributed to a platform for managing users, role-based access, question banks, and exam creation.
- Worked on AI-assisted question generation, a RAG-based chatbot, approval workflows, email notifications, and in-app messaging.
- GitHub: nova-io-vn/HAU-EXAM | Live: exam.nova.io.vn

EV-RangeMind (VOLT) — EV Route and Charging Assistant

FastAPI, React, PostgreSQL, OpenAI API, Capacitor, Docker

- Contributed to a mobile and web platform that helps EV drivers plan routes and find suitable charging stations.
- Integrated an AI assistant for text and voice interactions and supported station recommendations based on distance, charging capacity, and user ratings.
- GitHub: AI20K-Build-Phase-Cohort-4/P-118 | Live: ev-rangemind.nova.io.vn

Personal Manager — Desktop and Android App

FastAPI, React

- Developed a personal management app for tasks, schedules, expenses, and health tracking.
- Added Telegram bot notifications and interactions to help users manage information through chat.
- GitHub: nova-io-vn/personal-manager

Sign Language Recognition App

FastAPI, MediaPipe, Keras

- Built a sign recognition workflow using image data captured across varied angles, lighting, and hand positions.
- Processed images with MediaPipe to extract 21 hand landmarks, then prepared CSV data for model training.
- Generated Keras and PKL model files for use in the application.
- GitHub: vitcoder131/Ng-n-ng-k-hi-u-CV-
